

Before

On Tuesday morning, Katherine got up and turned on her computer to find out as usual what happened in the world while she was sleeping. She went to the news site and read the bygone news. Then her parents called her via video communication. She answered. The computer began to make noise and the video connection began to slow down very much. Katherine has experienced this a lot lately. But after that, the computer decided to reboot. Katherine decided to buy a new computer. She was upset by the prices for the already collection of computers. But since she did not know how to assemble it, she chose the cheapest one that was assembled and ordered. A few days later, Katherine's computer was delivered. She was very glad that she could now work faster and do multiple tasks at the same time.

After

On Tuesday morning, Katherine got up and turned on her computer to find out as usual what happened in the world while she was sleeping. She went to the news site and read the bygone news. Then her parents called her via video communication. She answered. The computer began to make noise and the video connection began to slow down very much. Katherine has experienced this a lot lately. But after that, the computer decided to reboot. Katherine decided to buy a new computer. Katherine knew about the online store "MyBuildPC" and having looked at all the computers, she did not know which one would suit her better. She called and consulted a store consultant and ordered a computer. After waiting a couple of days, I received a computer. Now she could work faster and do multiple tasks at the same time.
