Use-cases

Scenario 1 [BEFORE]

The New Year holidays will begin very soon and Alexander is looking for a gift for himself. He wants a new computer for himself. But first, he needs to consider what components he wants to build a new PC from. Then you need to find all the parts on the Internet for a normal price and order home delivery. It will still be good if all the parts are ordered from one store. After which he will have several days of delivery and a couple of hours of assembly before he can start playing his favorite video games.

Scenario 1 [AFTER]

The New Year holidays will begin very soon and Alexander is looking for a gift for himself. He wants a new computer for himself. It will not be difficult for him, because he knows about the site "MyBuildPC", where in a few clicks he can choose a ready-made one or assemble the computer of his dreams. Immediately after choosing, he can place an order and the next day a courier with his brand new computer will be waiting at the door of his house, which will satisfy all his desires in gaming.
